Management Style:
Active

Key Points:

This strategy is a low risk strategy available on **CONNECT**, which aims to provide a stable return by investing in a range of cash instruments.

Strategy Objective

Protect the value of member's funds against market movements.

For members who are close to retirement it is particularly useful for that element of the fund that will be taken as a cash lump sum. It is also useful for members that seek a safe haven asset class.

While these funds are intended to be low risk investments, investors should be aware that the funds could fall in value.

This could happen if, for example, a bank the fund has a deposit with cannot repay that deposit, or if the fund charges are greater than the growth rate of the assets in the fund.
